

# Axcient x360Cloud for Microsoft 365 Backup. Search. Restore.

Axcient

## Protect business productivity applications with x360Cloud for Microsoft 365

Data loss happens, even in the cloud. But can your organization afford to lose emails and work documents?

Microsoft 365 is the go-to productivity suite for businesses. Unfortunately, user error, malware, accidental deletion or malicious employees can pose serious risks to emails and work documents. The cost to organizations that experience data loss varies depending on industries – but in all cases it is significant.

Eliminating user error and other causes of data loss is unlikely. However, it is possible to minimize its cost and disruption to the organization. x360Cloud for Microsoft 365 ensures that the data used in an organization's instance of Microsoft 365 is backed up, restorable, and protected.

x360Cloud for Office365 can be used to perform backup and restore of Microsoft 365 emails, contacts and calendar (Exchange online) and files, folders and document libraries in sites, subsites in both: the classic site collections and the modern Team sites, communication sites (SharePoint online and OneDrive). Organizations that deploy x360Cloud for Microsoft 365 can rest assured that all of their critical Microsoft 365 data is backed up to the encrypted, tamper-proof Axcient Cloud.

With x360Cloud, all of your Microsoft 365 data is a click away. Using SmartSearch, an administrator can complete a full-text search on data across Exchange online and SharePoint online and complete a single click restore, instantaneously. Administrators can instantly search Microsoft 365 data with rich filtering and select the data to restore or export to a folder to satisfy e-discovery requests. In addition, detailed dashboards, reports, and monitoring of all backup activities demonstrate how x360Cloud is working to protect your Microsoft 365 data.

Finally, the x360Cloud platform significantly reduces the burden placed on administrators by supporting today's most popular SaaS applications, including Microsoft 365. From a single interface, administrators can perform cross-service instant full-text searches and point-in-time restores, making data easy to find and recover.

## KEY FEATURES:

Automated backup of Microsoft 365 data with the Axcient Cloud, providing total data protection

Specific and/or mass restores of archived data into Microsoft 365 applications

Export Microsoft 365 data to local storage

Instant full-text search and rich search filtering, ensuring data accessibility

Comprehensive overview of Microsoft 365 data backup, reducing administrative burden

The most comprehensive and complete regulatory compliance in the industry

Military-grade encryption, exceeding industry standards

## Features:

### AUTOMATED BACKUP OF CLOUD APPLICATION DATA IN THE AXCIENT CLOUD

- Backup Exchange Online, OneDrive, SharePoint, and Teams
- Backup of Google G Suite and Team Drive backup
- Multiple redundant Amazon S3 storage architecture with server-side encryption
